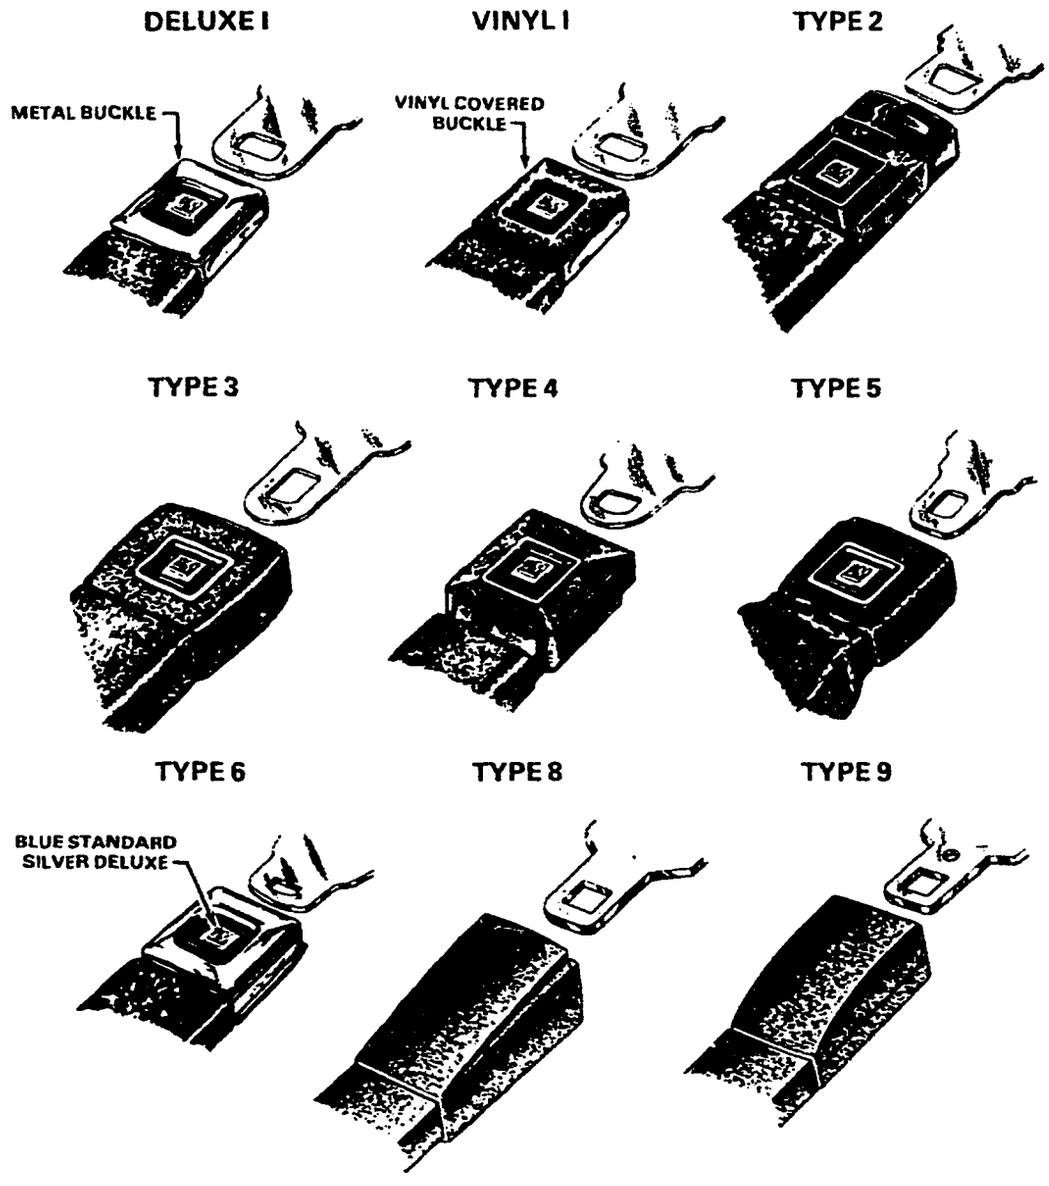
1982 - 93 SEAT BELT BUCKLES

CC14-001
122192



This illustration provides visual identification of the various types of production installed seat belts. The best distinguishing feature is the configuration of the metal "D" ring that inserts into the buckle. The different buckle designs can also be utilized in conjunction with their respective "D" ring to correctly identify the seat belt type. Not all types are available on each model.

NOTE: BUCKLE SIDE INCLUDES CENTER PASSENGER PROVISIONS WHEN APPLICABLE.
